## Product Highlights

Power over Ethernet
Support for IEEE 802.3at/af Power over Ethernet (POE) on ports 1 to 8 allows for powering of PoE-powered devices up to 250 m and ports 9 to 16 up to 100M

PoE Power Budget
A large 250W PoE power budget and up to 30
W per port for simultaneously powering multiple PoE-compatible devices

Plug-and-play
Plug-and-play installation means the switch can be quickly and easily installed without the need for any additional configuration

DGS-F1026P-E

## 250M 241000 Mbps PoE Switch with 2 SFP Ports

## Features

High-Speed Networking

- 24 10/100/1000 Mbps Ethernet ports
- Full/half-duplex for Ethernet/Fast Ethernet/Gigabit
- 2 SFP Uplink

## Functions

- VLAN
- EXTEND
- PoE
- QoS

Easy Setup

- Plug-and-play installation
- Auto MDI/MDI-X crossover on all ports

PoE Functionality

- Twenty-Four PoE ports
- IEEE 802.3af/at compliant
- 250W total power budget
- Up to 30 W power output per PoE port

The D-Link DGS-F1026P-E24 Port Switch with 10/100/1000Mbps and 2 SFP Ports enables you to connect Power over Ethernet (PoE) devices such as wireless access points (APs), IP cameras, and IP phones tothe network. The DGS-F1026P-E can also connect other Ethernet devices like computers, printers and a Network Attached Storage (NAS) to fit into any type of network application.

## Power over Ethernet

DGS-F1026P-E features twenty-four 10/100/1000 BASE-T ports that Support the IEEE 802.3af and IEEE
 providing a total power budget of 250 W . You can connect compatible devices to the DGS-F1024P-E without using an additional power supply. This allows you to save on cabling and to install devices in locations without immediate access to power outlets

## High Performance

The DGS-F1024P-E features plug-and-play installation and requires no configuration. Auto MDI/ MDI-X support on all ports removes the need for crossover cables when connecting to another switch or hub, and auto-negotiation on each port intelligently adjusts the port speed for compatibility with the connected device. With wire-speed filtering and store-and-forward switching, the DGS-F1024P-E maximizes network performance while minimizing the transmission of bad network packets.

With SFP uplink port mean businesses can increase their network bandwidth using the speed of gigabit ethernet and fiber.

## Function

The DGS-F1026P-E 24Port switch with PoE and 2 SFP; 6KV protected is equipped with smart features with a switch of button such as:
Extend - support up to 250 m distance power supply
VLAN - Isolating ports 1-24 from each other can effectively suppress network storms and improve network performance
QoS - Prioritize the identified video data to make video transmission smoother

PoE - Automatic detection power of port, power off and restart

## Expand and Upgrade Your Network

The DGS-F1026P-E offers an economical way for SOHO and small to medium businesses (SMB) to benefit from high-speed PoE networking.

It provides twenty-four PoE ports and 2 SFP port for easy expansion of your your network and supply power up to $250 \mathrm{~m}^{*}$ to your PoE devices. DGS-F1018P-E, Port 1-8 can supply power (802.3 af/at) up to 250 m distance at 10 Mbps , cost-effective solution for your SMB requirement. Unmanaged switch with rich function (Extend, VLAN, QoS and PoE) provides a reliable connection to your company infrastructure.

Example Configuration

## Technical Specifications
